PROFESSIONAL PROFILE

Resourceful back-end web developer with a personable demeanor and collegiate education. Adaptable in fast-paced environments, adeptly balancing teamwork with autonomy. Possesses strong analytical and problem-solving skills, alongside a keen eye for detail and organization. Natural leader committed to fostering motivation and excellence in teams. Leading tech initiatives for the Montagnard community of Vietnam.

PROFESSIONAL EXPERIENCE

Infosys Limited | Remote

March 2021 – Present

Senior Tech Process Associate - Apps

- Distinguished for adeptly identifying issues, meticulously analyzing information, and proactively delivering effective solutions during the update of a web application.
- Designed, developed, and maintained a web application utilizing C# and ASP.NET Core MVC.
- Successfully completed comprehensive company training encompassing Agile methodologies, Scrum practices, and ASP.NET frameworks.
- Acquired proficiency in essential skills necessary to contribute effectively across various stages of the software development lifecycle.
- Leveraged SQL to execute database updates, eliminate duplicate files, and conduct targeted file searches with precision.

Central Piedmont Community College | Remote

January 2021 – August 2021

Web-Based Learning I and II

- Created 2D animations and crafted 3D assets proficiently utilizing Blender 3D.
- Conceptualized, implemented, and maintained gameplay systems that achieved a fulfilling flow state, addictive game loops, and a risk/reward balance
- Developed the storyline, character back-stories, and dialogue, through scripts and storyboards, including any relevant research
- Created and maintained comprehensive documentation (such as designing outlines, diagrams, and visual mockups) that details the triggers, interactions, and subsequent events of specific features or aspects of gameplay
